

ABSTRACT OF THE INVENTION

Arrangements and packaging of multi-device, face-and-body-treatment systems are presented, for adapting these systems to self-application and to home use. In particular, a multi-device, face-and-body-treatment laptop-like kit is described, for beauty treatment "on the go." Additionally, a multi-device, face-and-body-treatment system built into a dresser is taught, for beauty treatment in the home. Other arrangements are also described.
